Jerusalem, 8 Adar , 5780  
March 4, 2020

**PRESS RELEASE**

**Results of the 23<sup>rd</sup> Knesset Elections**  
(unofficial, almost final)

These results are being published **following many thorough checks and control processes, which the Central Elections Committee has carried out and is continuing to carry out. With that, these are not the final results.** The final, official results will be published on **Tuesday, March 10, 2020**, and will be presented to the President of the State of Israel.

These results **do not include** the tally for 6 voting stations (which were open to 5,500 eligible voters, which is not the number of actual voters). These station's ballot boxes are still being scrutinized due to the fact that, during Election Day, there were issues connected to Elections Purity in some of those stations. These stations' results are still being examined.

Over the next few days, and **until the publication of the official, final results**, the Committee will continue to carry out a few levels of investigation:

1. As part of the "**Purity of Elections**" campaign, **700 voting stations have been examined using various parameters.** It is expected that a **few hundred more stations will undergo similar scrutiny.**

In the framework of this campaign, the Committee is checking complaints which were filed during Election Day and in the last few days, from the public, regarding attempts to impair Elections Purity, including reports from the Israel Police and reports from the Elections Purity patrol teams. Hundreds of such complaints have already been investigated.

**לכנסת ה- 23**  
**The 23<sup>rd</sup> Knesset Central Elections Committee**

2. Complaints from candidate lists are being investigated.
3. The committee is continuing to scrutinize the results – **including screening for typing errors, statistical errors and anomalies.**
4. In the checking of instances which were uncovered during the counting of double-envelope ballots, there were suspicions of people voting twice, including:
  - a. **877** cases of a suspicion of a voter casting a ballot in their regular station as well as voting in a special voting station, such as a station which is accessible for people with mobility impairments.
  - b. **438** cases in which there is suspicion of a voter voting in two special voting stations.

**It must be emphasized that the current investigations may impact the final results, and therefore the results published here may be adjusted.**
